COHERENCEBRIDGE CONSULTING

Compliance Lifecycle Management

Connecting regulatory expectations with operational reality.

Compliance is an ongoing organisational responsibility. Effective compliance connects regulatory requirements with business processes, responsibilities, controls and evidence.

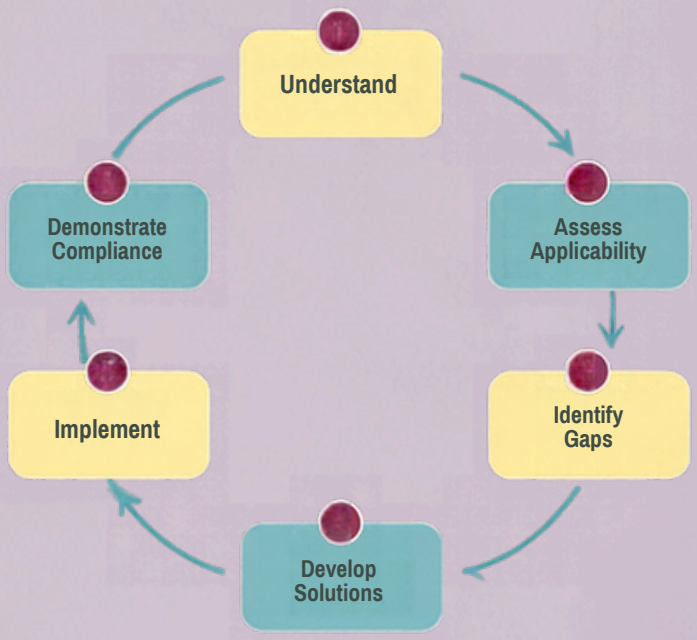

Understanding the challenges

- Increasing regulatory complexity
- Unclear applicability of regulatory requirements
- Fragmented compliance assessments
- Overlapping regulatory implementation initiatives
- Insufficient evidence of compliance

How we support you

- Regulatory analysis and interpretation
- Assessment of applicability and gap organisational impact
- Current-state assessments and gap analysis
- Identification of cross-regulatory dependencies
- Development of operationaly sustainable solutions
- Implementation planning and coordination
- Definition of documentation and evidence requirements
- Integration of compliance into existing governance structures

The compliance lifecycle

Processes first. Regulation second.

Embedding compliance into the organisation rather than building parallel structures.
